

**Each school receives a composite score, which is consisted of the points earned in all 3 contest levels as well as the qualifier round.**

**To calculate the points earned from the Qualifier Round.**

- 1. Add up the total number of questions all students from the school solved correctly.**
- 2. Divide the Step 1 result by the number of students. This represents the average score per student from the school.**
- 3. Multiply the Step 2 result by 0.05.**

**To calculate the points earned from each contest level.**

- 1. Add up the total number of questions all teams from the school solved correctly.**
- 2. Divide the Step 1 result by the number of teams. This represents the average score per team for that level.**
- 3. For level 1, the result from Step 2 is multiplied by 0.1.  
For level 2, the result from Step 2 is multiplied by 0.2.  
For level 3, the result from Step 2 is multiplied by 0.3.**
