

ACCUPLACER Course Placement and Transfer Score Conversion

October 2019

Placement Testing evaluates a student's skill and ability in Reading Comprehension, Writing, and Mathematics. The goal of these assessments is to place students in the appropriate level of coursework. Test scores aid the student and their advisor in developing a progressive academic and career plan. Many of the classes offered to degree seeking students require a reading proficiency prerequisite. Central Arizona College requires that students demonstrate reading skills and comprehension at a 12th Grade Level. The placement test will assess the student's appropriate level of reading skill and comprehension. Completing the reading course(s) will increase a student's overall academic success.

**We encourage students to seek the expertise of an advisor for all academic planning.*

* The ACT, SAT, or GED Scores can only be used to determine whether or not a student places above a developmental level course, it cannot be used as a placement tool for developmental courses or mathematics above MAT141/151/162. Rev. 10/2019
 SAT Scores are based on "NEW SAT" which began in Spring 2016. "OLD" SAT scores-prior to 2016 are different.
